LIFE IN SPACE

What's that light in the sky? Is it a star? Is it a plane? No. It's the International Space Station, 400 km **above** Earth! I'm here on the space station for six months with five other astronauts from Russia, the USA, Holland and Japan. We travel around Earth sixteen times every day, at a **speed** of 27,224 km per hour.

I get up at six o'clock **in** the morning and I wash. Everything **floats** in space because of zero gravity, including water! We have a special shampoo to **wash** our hair without water! I get dressed in a T-shirt and shorts. We only use the space suits outside the space station. Outside, the temperature **changes** a lot. It's 100°C in the sun, but it's -100°C in the dark. It's 23°C **inside** the space station **in** winter and **in** summer. 😊

We have breakfast **at** quarter to seven. All our food comes in **tins** and special **bags** and it isn't very nice. We don't have pizza on the space station. 😊

After breakfast, we do exercise for an hour. Our arms and legs don't do a lot of work on the space station because we **float**. Exercise is very important. We watch films in the gym. My favourites are Russian **comedies**. They're funny. 😊

Then we start work. We do experiments and work on the computers. We have lunch at one o'clock. **In** the afternoon I make videos for science lessons in schools. I answer questions from students about life in space. **Before** dinner we do **another** hour of exercise. 😊 40

In the evening and **at** the weekend, we play games, chat or use the internet. Yes, we've got the internet in space! **On** Sunday, we have a video chat with our families and friends. 😊 45

We go to bed early. We sleep in sleeping bags, so we don't float around the space station **at** night! 😊

1) Read the text below and circle *true* or *false*:

I get up at six o'clock **in** the morning and I wash. Everything **floats** in space because of zero gravity, including water! We have a special shampoo to **wash** our hair without water!
